Calusa Indian Language (Caloosa)

Calusa is an extinct Amerindian language of Florida. No records of the language remain other than a few place names in Florida, so it is unknown which language family Calusa might have belonged to. Although the Calusa tribe was once extremely powerful (defeating the Spanish on numerous occasions) and technologically advanced (building canals and artificial islands), they were devastated by European diseases and the tribe essentially disbanded in the early 18th century. Most of the survivors joined the [Seminole tribe](#) or went to Cuba, and their language was never written down before it vanished.

Tequesta Indian Language

The Tequesta Indians were a tribe of eastern Florida, closely connected with the [Ais](#). Their language was never recorded. Like the Calusa, the Tequesta were devastated by European diseases. Some of the survivors were sent to Cuba by the Spanish, while others may have merged with other Floridian Indians and eventually joined the [Seminole tribe](#).
